

Copilot

A whole new way to work

Cheng, Hua

Retros

- What - GitHub Copilot is an AI pair programmer trained on natural language text and source code from publicly available sources
- How - Install an extension called GitHub Copilot/Copilot Chat on popular IDE (VS Code, IntelliJ)
- Why - Mostly improve your productivity and efficiency on your daily work

Agenda

Use Cases

Live Demo

Limitations

Use Cases

- Layout - Layout Base on Native, Layout based on Framework etc
- Style - Pure style, UI Libraries etc
- Interaction - Code Generation, Structural Data, Common Util Generation, Code Explanation, Code Refactor etc

Live Demo

Blog Application

- Summary Page
 - Vertical layout
 - Full Width, Fixed Height 200px
 - Title, description, author, star, created time
- Detail Page
 - Back Icon
 - Transform Markdown into HTML

Blog 1

Blog 1

This is the first blog.

Section 1

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed eu

Section 2

Sed euismod, sapien vel lacinia luctus, velit sapien bibendum s

← Back

Limitations

1. Distracting - as it can suggest many different things, which can be ***overwhelming***, it can lead to a loss of concentration, which can ultimately slow down the coding process
2. Bad Habits - suggested code is not optimized, inefficient or even insecure, it is not friendly for ***new programmers*** who are not ability to identify
3. Version Detect - suggest code is not well based on existing code of workspace as the trained data is based on ***2021 and previous***

GitHub Next

Code Atlas

June 28, 2023

RESEARCH PROTOTYPE

How can we make LLM responses more robust and easier to understand by combining their fluid reasoning with rigid structure?

GPT-4 with Calc

May 11, 2023

COMPLETED

An exploration of using calculation generation to improve GPT-4's capabilities for numeric reasoning.

Copilot for Docs

March 21, 2023

BETA

How would it feel to have an expert on hand at all times? We built a tool that uses relevant information from a project's documentation to answer questions or explain concepts.

Copilot for Pull Requests

March 21, 2023

BETA

Pull requests are a central part of the GitHub user experience. Copilot for PRs brings the power of Copilot to the PR experience, to help you write better PR descriptions, and to help your team review and merge PRs faster.

Copilot for CLI

March 21, 2023

RESEARCH PROTOTYPE

Ever having trouble remembering that shell command or this obscure flag? Don't worry, we're building GitHub Copilot assistance right into your terminal.

Copilot Voice

March 21, 2023

BETA

Write code without the keyboard. Tired of typing? Use your voice to code without spelling things out by talking with GitHub Copilot.

Code Brushes

January 11, 2023

RESEARCH PROTOTYPE

Can editing code feel more tactile, like painting with Photoshop brushes? We added a toolbox of brushes to our visual Studio Code extension to make modifying your code.

GitHub Blocks

November 9, 2022

BETA

Imagine exploring code with custom, interactive blocks. Build rich documentation, enhance your workflows, and bring your codebase to life.

Collaborative Workspaces

October 19, 2022

RESEARCH PROTOTYPE

As we increasingly work together remotely, how might we unify our workflows to enable remote collaboration for developers? GitHub Next explores what "working together" means, beyond multiple cursors and a shared code editor.

GitHub Copilot Radar

October 13, 2022

BETA

GitHub Copilot Radar is a code navigation tool that shows developers the most relevant line of their position in the code. It's jump to definition on (neural) steroids.

GitHub Copilot for "Your" Codebase

October 13, 2022

BETA

We want to let Copilot see the code in your entire repo to make suggestions even better.

Incremental CodeQL

October 11, 2022

RESEARCH PROTOTYPE

Faster feedback about security vulnerabilities on your code.

Conclusion

I have to say Copilot do helpful for our development work but we can't be fully rely on it.

Just a Copilot!

THANK YOU!
